PROFILE

Final-year Computer Science and Engineering student who builds web apps and designs interfaces. I built two PHP and MySQL web apps on my own, designed and built a company website in Next.js, and moved up from UI/UX designer to team leader at NextGen Production.

PROJECTS

Chol Ghuri · Group travel matching and cost sharing for students (final-year project) 2026
PHP 8.2, MySQL, JavaScript, HTML, CSS, PHPMailer · github.com/Asiff-k/Chol-Ghuri

- Built a matching engine that filters groups by destination, dates, free spots, budget and group rules, then scores the rest out of 100 and explains each score.
- Built per-person pricing that updates as members join or leave, and expense splitting in whole taka with a settle-up flow between members.
- Added email verification and password reset with hashed one-time tokens, plus an admin panel for packages, destinations, universities and users.

CareerNavigator · Career recommendation platform 2026
PHP 8.2, MySQL, JavaScript, HTML, CSS, PHPMailer · github.com/Asiff-k/CareerNavigator

- Built a weighted compatibility score from skills, interests, project evidence and CGPA, with a skill-gap report and a learning roadmap for each career.
- Built student, advisor and admin roles, protected with CSRF tokens, prepared statements, role checks and email verification.

incodet.com · Designed and built the website for Incodet, a software development company, including its case study pages.
Next.js, Tailwind CSS, Vercel

UI design · Designed the interfaces for the Cipher Shield, KI Training & Assessing, BRHEX Studio and NextGen Production websites.

EXPERIENCE

UI/UX Designer and Team Leader · NextGen Production Jul 2025 – Nov 2025

- Designed interfaces for web and mobile products, from wireframes to final screens.
- Moved up from designer to team leader and led the team for the last three months.
- Set daily priorities, assigned tasks and balanced the workload so the team delivered on schedule.
- Worked as the link between designers and developers so work moved between them without delays.

Software Development Intern · CodeSoft Dec 2024 – Feb 2025

- Three-month internship doing web development work on the team's live projects.
- Took part in team reviews and planning sessions and reported progress on my tasks.

AI DATA PROJECTS (SHORT-TERM, COMPLETED)

First-person video capture · HumanData Labs · Atlas Capture Oct 2026 (15 days)

- Recorded more than 100 hours of first-person video of household tasks as AI training data.

AI video segmentation · DOT Lab May 2026 – Aug 2026

- Segmented more than 230 hours of video for training AI-powered robots. Top performer for two months in a row.

Satellite image annotation · Arc Annotations · Ginger 2025 Dec 2025 – Feb 2026

- Annotated satellite images, mapping roads, buildings and landscapes.

EDUCATION

BSc in Computer Science and Engineering · Leading University, Sylhet · CGPA 3.22 2022 – 2027 (expected)

Higher Secondary Certificate (HSC) · Cambrian School & College, Dhaka · GPA 4.08 2020 – 2021

Secondary School Certificate (SSC) · Cambrian School & College, Dhaka · GPA 4.72 2018 – 2019

SKILLS

Development	PHP, MySQL, JavaScript, HTML, CSS, Next.js, Tailwind CSS, Flutter, Git and GitHub
Design	Figma, Canva
AI tools	Claude, Perplexity, HeyGen, Synthesia, Colossyan
Leadership	Team leadership, task assignment and follow-up, workload planning, cross-functional coordination, remote collaboration
Work tools	Google Docs, Sheets and Drive, Microsoft Word, Excel and PowerPoint, Notion
Languages	Bengali (native), English (fluent), German (basic)
